Power Supply Units

Range of Models

Diesel Series

Diesel Series Plus+

Diesel Series Hybrid

Fuel Cell Series Hybrid

Advantages

- Total control
- Operation monitoring
- Load adjustment (DC/AC)
- Compact Design
- Easy Installation

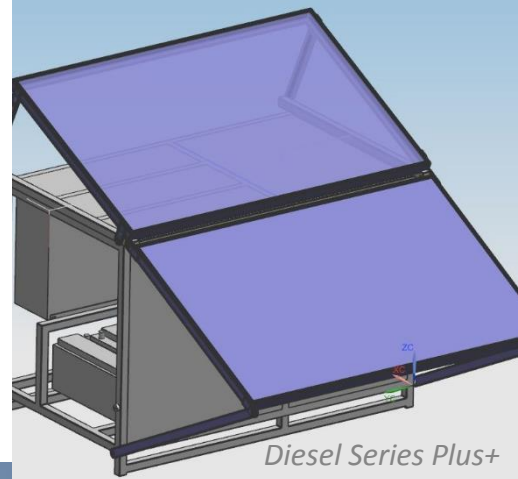

Applications

- Transponder masts powering
- Autonomous off-grid housing
- Meteorological station powering
ie. Lidar, Sodar, Heated Sensors
- Military Applications

System Specifications

- 24/48Vdc or 220Vac Regulated Power Output
- Configurable Battery capacity
- Configurable system Autonomy
- Remote control
- Parametric Data logging and Database Integration
- Rigid Shell

In-house developed software provides all the necessary tools in order to control and guarantee a smooth and uninterruptible power to any external load according to Power Supply Unit's specifications.
